About Us

Founded in 2012, RAWAFED LIBYA (RLTT) stands as a leading Telecommunication & Technology firm in Libya. We excel in delivering top-tier internet services and telecom solutions, with a specialization in satellite and wireless internet connectivity, cybersecurity, and technology infrastructure. Our expertise spans across various sectors, including banking, education, healthcare, media, oil & gas, security, transport, and utilities.

Headquartered in Tripoli and with multiple offices nationwide, RLTT boasts extensive experience in designing, deploying, integrating, and managing advanced telecom and technology systems. We collaborate with industry leaders to ensure our services are of the highest quality and efficiency.

At RLTT, we are dedicated to our clients' success, offering customized products and services that guarantee reliability and security. Our vision is to become a world-class Libyan enterprise, expanding our footprint in both domestic and regional markets.

Social responsibility is at the core of our values. We are committed to extending high-speed internet to underserved regions and actively support humanitarian and charitable initiatives.

Certifications

Rawafed Libya has been awarded three prestigious ISO certifications, underscoring our commitment to excellence and continuous improvement.

Our Management System has been certified as per ISO 45001:2018, ensuring the highest standards in occupational health and safety.

Additionally, we have achieved certification for EN ISO 9001:2015, reflecting our dedication to quality management, and EN ISO 14001:2015, highlighting our commitment to environmental management.

These certifications are a testament to our unwavering dedication to providing superior services while maintaining the utmost standards of safety, quality, and environmental responsibility.

Partners

RAWAFED Libya has formed a variety of partnerships to ensure we can deliver the best solutions and quality to the Libyan market which comprises of:

Inmarsat, Rawafed Libya is the Exclusive Regulatory Partner - Relied on for over 40 years, Inmarsat's world-leading satellite networks touch every aspect of life, all over the planet, to keep communities, companies and countries connected when it matters most - even during the most turbulent times.

Inmarsat offers global mobile services, telephone and data services to users worldwide, via portable or mobile terminals which communicate with ground stations through fourteen geostationary telecommunications satellites.

Rawafed Libya is OneWeb's Exclusive Partner - Eutelsat is the World's first GEO-LEO satellite operator - Eutelsat have joined together to become the home for truly global, resilient GEO-LEO satellite services.

Eutelsat Group is powered by its two strong business units, Video and Eutelsat OneWeb for connectivity. The combination strategically positions Eutelsat Group as a global leader in space communications.

Rawafed Libya is the Value-Added Reseller - Nokia is at the forefront of the telecommunications industry, offering a comprehensive portfolio of products and services that span mobile, fixed, and cloud networks.

Nokia's telecom operations are driven by innovation and a commitment to connecting people and businesses worldwide. The company is renowned for its contributions to the development of key technologies, which have revolutionized mobile communications.

Through its cutting-edge solutions, Nokia enables seamless connectivity, enhances network performance, and supports the digital transformation of industries.

By leveraging its expertise in network infrastructure, software, and services, Nokia continues to shape the future of telecommunications, ensuring that networks are more efficient, secure, and capable of meeting the demands of an increasingly connected world.

Rawafed Libya is the only Partner in Libya - Akamai, Provides cloud services for content delivery, cybersecurity, and performance optimization. Akamai operates a global network of servers to enhance web and mobile experiences, offering solutions for application protection, DDoS mitigation, and media delivery.

APC by Schneider Electric Specializes in data center infrastructure, offering solutions for power management, cooling, and data center infrastructure management (DCIM).

APC's products ensure efficient and reliable operations, covering everything from uninterruptible power supplies (UPS) to prefabricated data center modules. The company is a key player in maintaining data center uptime and energy efficiency.

Viasat, is a provider of high-speed satellite broadband services and secure networking systems covering military and commercial markets. For more than 30 years, Viasat innovations have helped shape how consumers, businesses, governments, and militaries around the world communicate - bringing connectivity when, where, and how it's needed most, even in the hardest-to-reach places.

Viasat ensures people on-the-go have access to the same quality of internet in the air or at sea as they have at home. Viasat give`s businesses of all sizes the freedom to keep their people, places, and things secure and connected.

Rawafed Libya is the only direct CSP partner in Libya - as well as Microsoft Authorized Education Partner (AEP), Rawafed Libya carries Microsoft's fullest support to Promote and Implement Microsoft's products and services across all markets within Libya.

Microsoft has a strong presence in in AI with products like Microsoft Copilot and Azure AI. Microsoft offers a comprehensive suite of security solutions, including Microsoft Defender for Endpoint, Microsoft Sentinel, and Microsoft 365 Defender, which provide advanced threat protection, security management, and compliance solutions.

The Libyan Telecommunications Holding Company (LPTIC) - invests in communications infrastructure in the country and abroad. LPTIC owns a group of investments nationally, namely Libyana, Almadar Aljadid, Libya Telecommunications and Technology (LTT), Aljeel Aljadeed for Technology, Al-Bunya Investment & Services Company, Libya Post, Libyan International Telecom Company (LITC), these companies have a major role in developing telephone communications, mobile phones, and communications.

Cisco also offers hyper-converged infrastructure solutions, such as Cisco Compute Hyperconverged with Nutanix, which combines compute, storage, and networking into a single, easily managed platform.

Cisco, A global leader in networking technology, Cisco develops, manufactures, and sells networking hardware, software, telecommunications equipment, and other high-technology services and products. Cisco is known for its extensive range of products including routers, switches, cybersecurity solutions, and collaboration tools like Webex.

Hughes - is the world's leading provider of broadband satellite services & managed network solutions for communities, businesses and governments. Hughes supplies advanced broadband systems and terminals, mobile satellite systems, handhelds and IP data terminals, enabling the delivery of privately operated and branded services and solutions.

Evinsys, Rawafed Libya is the Exclusive Partner - Evinsys revolutionized the Digital Oilfield by delivering a game-changing technology for Real-time Data Acquisition, Data Management, Time- Series Historian, Business Intelligence, Data Driven Analytics, HTML5 Visualization and Lot Managed RTU's. Evinsys has best in class technologies.

Veeam - An information technology company specializing in backup, disaster recovery, and modern data protection software for virtual, cloud-native, SaaS, Kubernetes, and physical workloads. Veeam is known for its robust data resilience solutions that ensure data availability and recovery across various platforms.

TARGET - Energy solutions, is an international technology and services Company focused on delivering digital transformation solutions to data-driven industries.

Mobotix, Dose not see itself as a classic manufacturer of cameras. In terms of IoT, Mobotix's video systems are computers with lenses, working intelligently and with embedded storage capacities and developing solutions based on the German way of engineering and approaching things as this is appreciated as being particularly innovative and of high quality.

Sangoma solutions are customer specific end-to-end solution portfolio includes everything a business needs to thrive, all from a single, integrated provider, Unified Communications, PBX, Service provider gateway, VOIP Gateway, Contact Centre, Video Meetings, Access Control, Integrated Business Phones, Hardware, and Accessories, Custom and Pre-Built Applications.

MOTOROLA

Rawafed Libya is the only Authorized Reseller in libya - Motorola develops and integrates cutting-edge technologies, critical communication systems, command centers, and video security solutions to safeguard people, property, and places by fostering essential collaboration between public safety agencies and enterprises.

Motorola's devices and networks are engineered to excel even in the most challenging conditions, ensuring seamless connectivity and clear communication. Motorola provides valuable perspectives that empower decision-makers with focus, accuracy, and speed.

ORBCOMM, is a pioneer in IoT technology, empowering customers with insight to make data-driven decisions that help them optimize their industrial operations and build a more sustainable future. With 30 years of experience and the most comprehensive solution portfolio in the industry, ORBCOMM offers industrial internet and machine to machine (M2M) communications hardware, software and services designed to track, monitor, and control fixed and mobile assets in markets including transportation, heavy equipment, maritime, oil and gas, utilities and government.

ORBCOMM provides hardware devices, modems, web applications, and data services delivered over multiple satellite and cellular networks.

Dell Technologies, A global technology company that designs, develops, and manufactures personal computers (PCs), servers, data storage devices, network switches, software, and computer peripherals. Dell is known for its direct-sales model and extensive range of products, including laptops, desktops, and enterprise solutions.

HP (Hewlett-Packard): HP develops and provides a wide variety of hardware components, software, and related services to consumers, small and medium-sized businesses, and large enterprises. Known for its PCs, printers, and enterprise products, HP was split into HP Inc. and Hewlett Packard Enterprise in 2015.

HP also offers Poly solutions, which include a range of audio and video conferencing products designed to enhance communication and collaboration in business environments.

Tenable A cybersecurity company known for its vulnerability management solutions, including the widely used Nessus scanner. Tenable helps organizations identify and manage cyber risks by providing continuous network monitoring and comprehensive vulnerability assessments. As of 2023, it serves around 44,000 customers, including 65% of the Fortune 500.

EPIC People On Boarding, the POB System has been specifically designed to meet the needs of the Oil and Gas industry for use at Oil Fields, Camps, on floating accommodation semi-subs, fixed installations, jack-ups and FPSO's.

Squire Technologies Combines Cutting Edge Signalling Interworking Technology with Proven Carrier-Grade Network Products.

Squire Technologies provides signalling interworking, routing, fraud prevention and messaging platforms for multi-generation networks.

Squire Technologies solutions enable over 30 billion transactions per second and 11 trillion transactions per year.

Squire Technologies have deployments in over 6 continents, in 150+ countries and with 400+ customers.

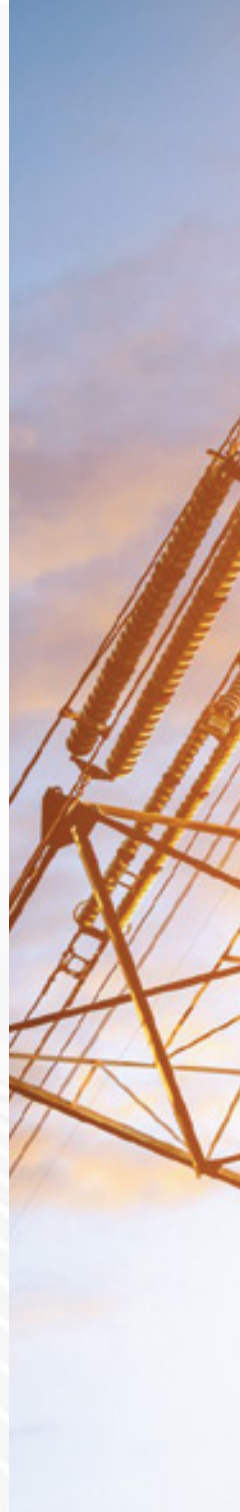

CORNING

CORNING is renowned for its innovation in optical fiber technology.

CORNING invented the first low-loss optical fiber over 50 years ago, sparking a telecommunications revolution.

Today, Corning continues to lead in the industry with a wide range of optical fiber products that are integral to modern communication networks.

Optical fiber from Corning is unmatched in bandwidth potential and performance, enabling voice, data, and video communications that are transforming our world.

an integrated approach

ICT Solutions

RLTT Systems Integration & Professional Services: In today's fast-paced digital landscape, seamless connectivity and robust infrastructure are paramount.

Rawafed Libya's ICT Solutions segment offers comprehensive System Integration, Network, and Infrastructure services designed to meet the evolving needs of modern businesses.

We specialize in creating integrated systems that enhance operational efficiency, ensure reliable network performance, and provide scalable infrastructure solutions.

Whether you're looking to streamline your IT operations, enhance security, or expand your network capabilities, our expert team is here to deliver tailored solutions that drive your business forward.

Digital Oilfields Solutions

Rawafed introduced a Joint Digital Oilfields Site and Asset Monitoring Solutions, integrating various products like Mobotix, Asset Tracking Hardware and Inmarsat together for an all-in-one solution, Securing and Monitoring of Remote Wellheads and Tracking Any Assets if they were to be stolen.

Rawafed offers a complete set of solutions, or individual components as required by the customer. Our offerings include hardware, software, communications connectivity, monitoring of wellheads and pipelines, data management, as well as design, implementation, training, acceptance testing, and handover. We are committed to advancing the digital oilfields of the future.

Cybersecurity Solutions

In today's digital age, safeguarding sensitive information and ensuring the integrity of IT infrastructure is paramount.

At Rawafed Libya, we specialize in the provision, design, installation, and maintenance of cutting-edge cybersecurity solutions.

As proud partners with some of the world's most prominent cybersecurity companies, we bring unparalleled expertise and advanced technologies to our clients.

Our comprehensive services include:

- **Provisioning:** We assess and identify the most suitable cybersecurity solutions tailored to your specific needs.
- **Design:** Our team of experts crafts robust security architectures that protect against evolving threats.
- **Installation:** We ensure seamless integration of security systems into your existing infrastructure.
- **Maintenance:** Continuous monitoring and support to keep your defenses strong and up to date.
- **Partnerships:** We are proud partners with industry giants such as Microsoft, Cisco, Akamai, and Tenable. These collaborations enable us to deliver robust and advanced cybersecurity solutions by integrating state-of-the-art technology and industry best practices into our services.

We are currently engaged in numerous high-profile projects, providing top-tier cybersecurity solutions for major businesses and government sectors.

Our commitment to excellence and innovation ensures that our clients are always a step ahead in the ever-changing landscape of cyber threats.

Data Center Solutions

In today's digital era, the backbone of any successful enterprise lies in its ability to manage and process vast amounts of data efficiently and securely. Rawafed Libya specializes in delivering comprehensive data center solutions that cover the entire lifecycle of data center management - from initial provisioning and design to installation, configuration, and ongoing support.

- **Provisioning and Design:** Our process begins with a thorough assessment of your business needs, ensuring that the data center design aligns with your operational goals and future growth plans. We focus on creating a scalable, resilient, and energy-efficient infrastructure that supports high availability and optimal performance.

- **Installation and Configuration:** Once the design is finalized, our expert team handles the installation of all necessary hardware and software components. We ensure that every element, from servers and storage devices to networking equipment and cooling systems, is installed with precision and care.

- **Support and Maintenance:** Beyond the initial setup, we provide ongoing support and maintenance to keep your data center running smoothly. Our proactive monitoring and management services help prevent issues before they arise, ensuring maximum uptime and reliability. With Rawafed Libya, you can rest assured that your data center is in capable hands, allowing you to focus on your core business activities.

- **Partnerships:** We have established strategic partnerships with industry leaders such as Microsoft, Cisco, Dell, and Schindler. These partnerships allow us to integrate cutting-edge technologies and best practices into our data center solutions. Microsoft provides robust cloud services and software solutions, Cisco offers advanced computing, networking and security infrastructure, Dell supplies high-performance servers and storage systems, and Schindler contributes innovative IT Datacenter facility systems.

Fiber Optic Cabling Solutions

At Rawafed Libya, we specialize in the provision, design, installation, and maintenance of state-of-the-art fiber optic cabling systems. Our expertise extends across diverse environments, including the challenging terrains of the desert, where we are actively laying cables to connect all major oil and gas fields with coastal terminals.

We are proud partners with Corning, leveraging their fiber expertise and cutting-edge technology to enhance our capabilities. This partnership allows us to utilize Corning's advanced fiber optic solutions, ensuring higher performance, greater reliability, and enhanced durability.

Our commitment to excellence ensures that we deliver robust and reliable fiber optic solutions tailored to meet the unique needs of our clients. We are proud to be at the forefront of connecting most business and government sectors with high-speed, high-capacity fiber optic networks, enhancing communication and operational efficiency across the region.

Cloud Solutions

We are at the forefront of delivering comprehensive cloud solutions tailored to meet the diverse needs of our clients. As proud partners with Microsoft, we leverage their cutting-edge technologies to provide robust, scalable, and secure cloud solutions.

Our expertise spans various sectors, with ongoing projects involving the provisioning of Microsoft products and cloud solutions to major business and government entities. We are committed to helping our clients achieve operational efficiency, enhanced security, and significant cost savings through our innovative cloud services.

Rawafed Libya stands out as the only direct Cloud Solution Provider (CSP) partner in Libya. Additionally, as a Microsoft Authorized Education Partner (AEP), Rawafed Libya enjoys Microsoft's fullest support to promote and implement their products and services across all markets within Libya. This unique position allows us to offer unparalleled support and solutions to our clients.

Our team at RLTT brings extensive expertise in cloud migration, ensuring a smooth and efficient transition for our clients.

Our commitment doesn't end with migration. We provide continuous support and maintenance to ensure your cloud infrastructure remains secure, up-to-date, and aligned with your evolving business needs.

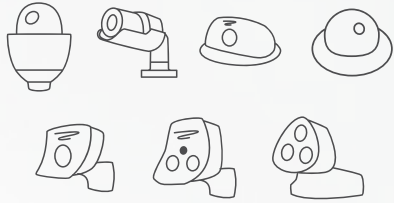

Training and Knowledge Transfer: We offer comprehensive training for your team to ensure they are well-equipped to manage and utilize the new cloud environment effectively.

Our proven track record in cloud migration projects for major business and government sectors demonstrates our ability to deliver successful outcomes.

CCTV Solutions

At RLTT, we excel in providing, designing, installing, and maintaining advanced CCTV solutions. Partnering with leading global CCTV brands like Mobotix, we deliver cutting-edge technology and expertise to every project.

Our dedicated team crafts customized surveillance solutions tailored to the unique needs of each client. We serve major business and government sectors, ensuring robust security and peace of mind. Our expertise extends to securing data centers, corporate offices, and government properties, where we implement state-of-the-art surveillance systems to protect critical infrastructure and sensitive information.

We have a proven track record of designing and installing CCTV systems in high-risk environments such as oil and gas fields, terminals, and ports. Our solutions are engineered to withstand harsh conditions and provide reliable security in these vital sectors.

Additionally, we are actively engaged in ongoing projects to install comprehensive CCTV systems in various cities and towns, enhancing public safety and urban security.

From small businesses to large governmental organizations, our comprehensive services cover every aspect of CCTV implementation. This includes initial consultation, design, installation, and ongoing maintenance. Trust RLTT to protect your assets with the highest standards of security technology.

Internet Services

OneWeb Service

Rawafed Libya exclusively offers OneWeb's regulated two-way Low-Earth Orbit (LEO) internet services in the region. This advanced technology provides reliable backhaul solutions for both urban and remote areas, making it ideal for businesses and operators.

OneWeb delivers internet speeds up to 150 Mbps with a Latency of 100ms one-way, ensuring smooth browsing, high-quality streaming, and fast downloads. Its versatile deployment options include fixed installations and mobile platforms, such as vehicles, offering flexible connectivity solutions. Additionally, OneWeb's secure and dependable internet access is perfect for businesses and governments.

VSAT Service

VSAT service is a Technology that uses satellites to provide high-speed Internet Service whether for home or commercial use at reasonable prices and completely independent from any other local Internet services.

Whether you live outside the city where no infrastructure is available or you have a weak signal, our innovative value packages can provide you with all the speed and stability you need around the clock.

Wireless Leased Line Service

Obtain a high-quality wireless internet service (Point to Point) through our Towers across the country (Tripoli, Janzur, AL-Serraj, Gharyan, Al-Brega, Benghazi, Musaid) among other Libyan Cities.

This service provides a high and stable Internet connectivity & performance around the clock without a need for a fiber-optic connection.

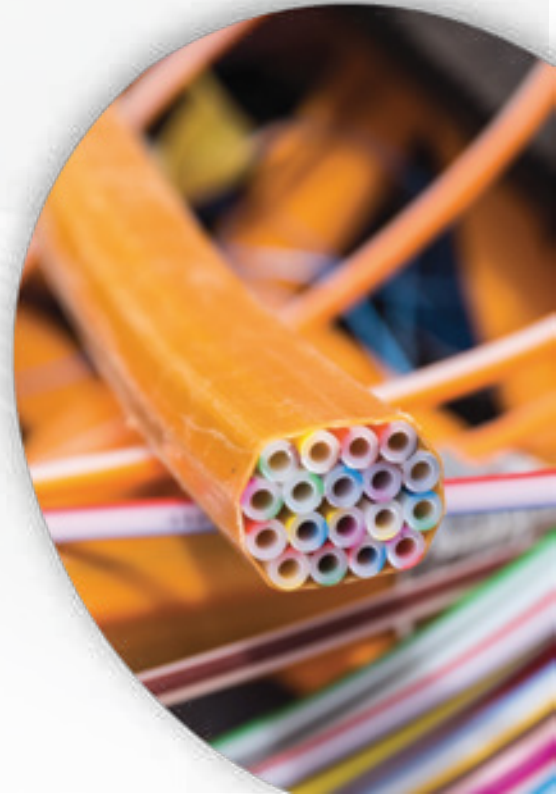

Leased Line Service

Our Leased Line service is a dedicated high-speed telecommunications circuit that connects two or more sites which can be offered in and across Libyan cities.

This premium Internet connectivity service, delivered over fiber, permits customers reserving any fitting amount of bandwidth for their usage which provides uncontended, symmetrical bandwidth with full-duplex traffic. Performance on your connection does not change nor decrease even during peak times.

This service can be used to connect to the Internet, exchange commercial data, voice and video calls or any other form of wired and wireless communication.
